

Phoenix Against Domestic Violence

MISSION STATEMENT

The city of Phoenix is committed to becoming a national leader in preventing and responding to domestic violence. To meet this goal, the city has adopted and is implementing a “Roadmap to Excellence,” which is:

Comprehensive: The plan takes a holistic approach to the problem. New solutions are being sought for every aspect of the problem including education, community awareness, victim services, and justice system reform. The city will begin with an examination of all policies and operating guidelines to assure they model best practices.

Collaborative and Communitywide: The plan relies on collaborative partnerships with the private and nonprofit sectors across all communities and cultures. Everyone shares in the opportunity and responsibility to end the violence.

Persistently Focused on Innovation: The plan seeks to continuously explore new ways to leverage technology and seek innovative approaches to implement high-impact solutions.

Culture Changing: The ultimate goal is to utilize every resource available to create a community consensus where domestic violence is unacceptable and will not be tolerated under any circumstances.

Community Campaign
